“ *Felix is my father, and there are way too many memories to list here. Above all else, I want it to be known that my father worked hard to provide for his family and that we will always appreciate everything he ever did for us. He was taken from us way too soon and I will always be thankful for his influence on my life. My only hope is that he is able to see that I have finally taken his advice and gone back to school to major in business, which is what he always wanted. I'm doing this not because he told me to, but because I choose to... but I choose to because he was right and I see that now.*

I will make you proud, Dad. I promise.

*Love,
Mike*
